

# Cable Extension Arms

TYPE 316 Stainless Steel

Used to support a telephone cable at a distance from the pole. The messenger wire is held by a standard #TBC-1316SS Suspension Clamp which is bolted up against the under side of the angles by a stainless steel 5/8" machine bolt. The machine bolt goes between the legs of the two angles and permits adjustment. Mounting is accomplished by a 5/8" machine bolt at the upper position and 1/2" lag screw at the lower position.
