

THREE BOLT SUSPENSION CLAMP

HEAVY DUTY SERIES

CATALOG # TBC-2316SS

Strand Size: 1/2" thru 5/8" Dia.

Material: AISI Type 316 Stainless Steel

The TBC-2316SS, three bolt clamp is manufactured for heavy cables on long spans and used with stainless messenger. Two 5/8" stainless steel bolts are assembled on the three bolt clamp. When attaching the clamp to the pole, one or more nuts or washers are placed between the clamp and the pole to provide clearance for the cable. Where messenger strand is used as an overhead static ground wire these clamps facilitate attaching to the bayonet.
